

# Gordon Swift Middle School

## Electrical Trade Contract

Oakville, CT

Banton recently completed the electrical scope of work on the Gordon Swift Middle School. Banton served as the electrical trade contractor under the construction manager throughout the duration of the project.

The project consisted of 13 phases for the interior demolition and renovation of a 101,600 square foot occupied school, the construction of a new auxiliary gymnasium and a three-level addition for science classrooms, administration offices, kitchen and cafeteria.

Banton's role in the project involved the implementation of all electrical systems throughout the school. The project included a new 2500-amp electrical distribution system, 350kw generator, interior and site lighting, fire alarm, public address, intercom, CCTV, security, integrated video distribution system, hearing impaired, and auditorium stage lighting and sound systems.

*Role:* Prime Electrical Contractor

*Owner:* Town of Watertown

*CM:* O&G Industries
