

Quinnipiac University

Mount Carmel Campus

Dining Hall Additions

Hamden, CT

Banton broke ground on this project, which consisted of multiple phases, in 2008. The project was completed on schedule in August 2010.

The project entailed the renovation and expansion of the existing Dining Hall and adjacent spaces on the University's main campus. The work included new and relocated underground utilities, sprinkler piping for the existing kitchen area and direct-burial hot and chilled water piping.

Throughout the project, Banton worked closely with both the Owner and Architect to carefully coordinate all construction activities in order to alleviate any disruption to the University's daily operations.

For the past several years Banton has cultivated a close working relationship with all other members of the University's project team. The Dining Hall project is the latest (and largest thus far) in a series of projects that Banton has successfully completed for the University.

Role: General Contractor

Owner: Quinnipiac University

Architect: Centerbrook Architects

Owner's

Representative: Pegasus Group
