

# Showcase Cinemas Renovations

North Haven & Berlin, CT

Banton was awarded the contract to renovate and replace the concession stands at both the Berlin and North Haven movie theaters. The work involved was extensive and required underground excavations for new soda lines, new plumbing and electrical lines to accommodate the new cabinets and multiple aerial display boards.

The project scope also included total replacement of the existing concrete floors with new tile flooring and the installation of new ceilings throughout the concession stands.

During the duration of the project all theaters and satellite concession stands remained fully operational. Public safety measures were an utmost priority, and tolerances for noise due to construction were non-existent. Despite these challenges, Banton completed both projects in record time and without issue or delay.

*Role:* General Contractor

*Owner:* National Amusements

*Architect:* In-House Design
